

Project 1: Classic HTML Document

Due: Tuesday, October 9, 2018

Project 1

- Like Lab 4 ...but different
- New content; a person
- Content drives structure
- NEW: do **not** use

```
<header></header>  
<article></article>  
<aside></aside>  
<footer></footer>
```

...you can use those elements, but not in that exact way

Project 1 Structure

- See: [w3schools.com](https://www.w3schools.com/html/html5_semantic_elements.asp) "New Semantic/Structural Elements"
- Typical:
 - HEADER
 - NAV (not yet)
 - MAIN
 - ARTICLE
 - SECTION
 - ARTICLE
 - ASIDE
 - FOOTER
- No content in-between - think "scaffolding"
- Remember: re-use elements!

Other Requirements

- FIGURE and FIGCAPTION - not required
- Required: data table
 - Know what is a "data table"
 - No "inline styles"
 - No old fashioned styling attributes: cellpadding or cellspacing
 - Do use: the old fashioned attribute "border"

```
<table border>
```

```
...
```
